Reasons for allowance

2. The primary reasons for allowance of claims 1, 11-13, 30 and 41 in the instant application is the combination with the inclusion of the limitation of " the security check unit is configured to use the physical address to access at least one security attribute data structure, and generating a fault signal dependent upon the security attributes of selected memory page **and** the additional security attribute of the selected memory page".

Because claims 2-10, 14-29, 31-40 and 42-49 depend directly or indirectly on claim 1, 30 and 41. These claims are considered allowable for at least the same reasons noted above.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

a. McKee US 2003/0115476 discloses hardware enforced control of access to memory.
